

Pico CTF Cookies

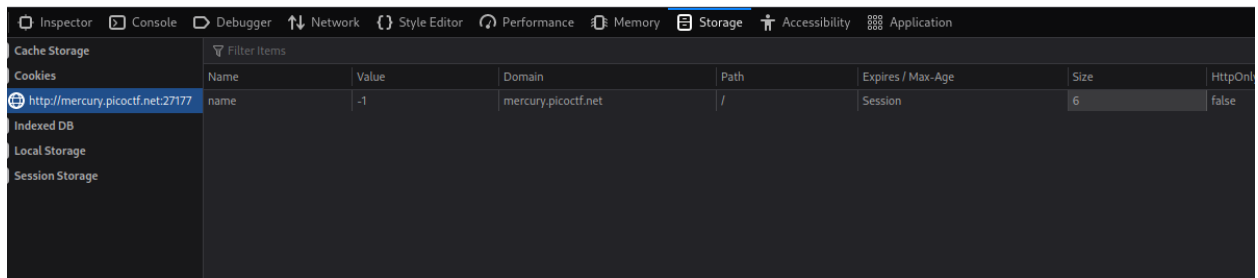

I opened up the link and saw this screen. Upon entering a few different cookies, I could see that it was pulling cookies from some sort of storage. I then used inspect element and found that there was a storage for cookies.

I could see for some reason that the value was set to -1. After changing it to 0 and refreshing it did not change but it did at 1. So then I proceeded to enter every number until 18 finally worked.

Flag:`picoCTF{3v3ry1_l0v3s_c00k135_064663be}`

ger ↕ Network {} Style Editor 🔄 Performance 🗄️ Memory 📄 Storage ⬆️ Accessibility 🗄️ Application								
Items								
	Value	Domain	Path	Expires / Max-Age	Size	HttpOnly	Secure	Sa
	18	mercury.picoctf.net	/	Session	6	false	false	No

And the flag worked!
